Informujemy o właściwościach i cechach materiałów naturalnych, forniru, kamienia i skóry naturalnej, takich jak: zmienność barwy w obrębie jednego elementu, przeżycienia, nieregularnego usłojenia, mikropęknięcia, dziurki oraz o tym, że nie są to ich wady, lecz zalety. Sprawiają one, że elementy wykonane z naturalnych komponentów, posiadają unikalny i niepowtarzalny charakter dekoracyjny. Fornir dodatkowo, jest nieodporny na ciepło oraz zmienia swoją barwę pod wpływem promieniowania słonecznego. Więcej informacji można znaleźć w instrukcji 'Pielęgnacja i konserwacja mebli MARO'.

Please note that natural materials - veneer, stone and natural leather are distinguished by its unique properties such as: color variation in one element, lining or irregular grain, micro cracks and holes. These are not their disadvantages, but advantages. They make elements made of natural components inimitable and decorative. Additionally, veneer is not resistant to heat and changes its color when exposed to sunlight. More information can be found in "MARO furniture care and maintenance manual.
